

## Oxygen Administration Course 2004

On Saturday 27<sup>th</sup> March 2004, Northants 955 ran their first skills development course (SDC). Five members sat on an oxygen administration course run by Paul Bowman, assisted by Alan White and Nikki Cook.

The day was split between theory and practical sessions. The subjects covered were CPR, oxygen equipment, oxygen therapy in practice, diving illnesses, diving incidents and casualty examination. Each trainee having to under take two exams, one in the theory of oxygen administration and the other in CPR.

The five candidates Keith Lovejoy, Dudley White, Emma Fleet, Neale Fleet and Andy Whitmore, had an enjoyable day and learned a great deal.

They also passed the course, which is a bonus to the club as we now have eight people qualified to administer oxygen if there is an incident on a dive trip.
